

# Dual RNN LM

20

**Motivation**

**RNN LMs outperform n-gram LMs in language  
modelling task**

Use of abundant monolingual data was not  
easy to integrate with Dual n-gram LM

**Sharing of context at switching points  
can help capturing of long-term cross-lingual  
dependencies**

# Dual RNN LM

---

## Motivation

RNN LMs outperform n-gram LMs in language modelling task

Use of abundant monolingual data was not easy to integrate with Dual n-gram LM

Sharing of context at switching points can help capturing of long-term cross-lingual dependencies

# Dual RNN LM
